Art Unit: 2627

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 4-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Ando et al (6385744).

The independent claims merely read on sync codes within an optical disk data format. The reference shows an optical disk having a plurality of data sectors comprising a plurality of frames. The disk further having a plurality of sync codes fig 6, guard sectors fig 8, and ECC blocks fig 3.

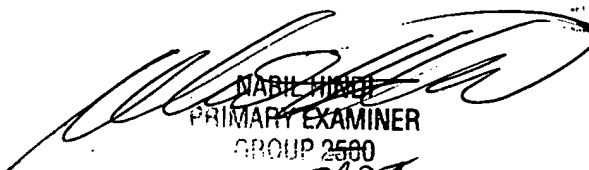

With respect to the limitations of claims 4 and 5 see fig 8 having the guard sectors and the sync sectors.

Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the cited prior art shows or teaches an optical disk having a first and second sync patterns as claimed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 7042372.
